New Vests for Custodial and Grounds Employees

In order to promote safety and visibility, FD&O has issued vests for our Custodial and Grounds crews. The bulk of our custodians work at night and the vests will allow other employees in the buildings to quickly identify them as authorized personnel. The vests will also improve visibility for our grounds crews as they work to maintain our campus grounds.

Topping Out Ceremony for the New Student Health and Counseling Center

On November 19, the Student Health and Counseling Center project had a Topping Out ceremony which is a huge milestone. A Topping Out ceremony celebrates the installation of the final structural beam in a construction project. This milestone was reached a full month ahead of schedule!

Short URLs

IT Services is now providing short URLs and custom URLs. URL shortening is a technique used to shorten a Uniform Resource Locator (URL), and still direct to the required web page. The main advantage is its shortness, which can be easily communicated and entered with less chance of error. Visit [Short URL](#) to get started.

Campus Computer Patch Management

The Campus Computer Patch Management Program will provide SJSU's desktops, laptops and servers with the latest application and security updates.

The program will include a campus-wide system in which system administrators can log in, see the devices they support, see new software that is available and deploy updates quickly and easily.

The system will also allow administrators to install new software on your computer without having to make an in-person visit while you continue to work. This will make the latest, greatest and most secure versions of software always available.

The Campus Computer Patch Management Program is currently underway with a number of pilot groups already using the tools. This December, training will take place and the tools will be made available to all University computers.

IT Services is excited to bring the latest in software management to SJSU!
