Will Artificial Intelligence have Free-will?

The Way the Creature did?

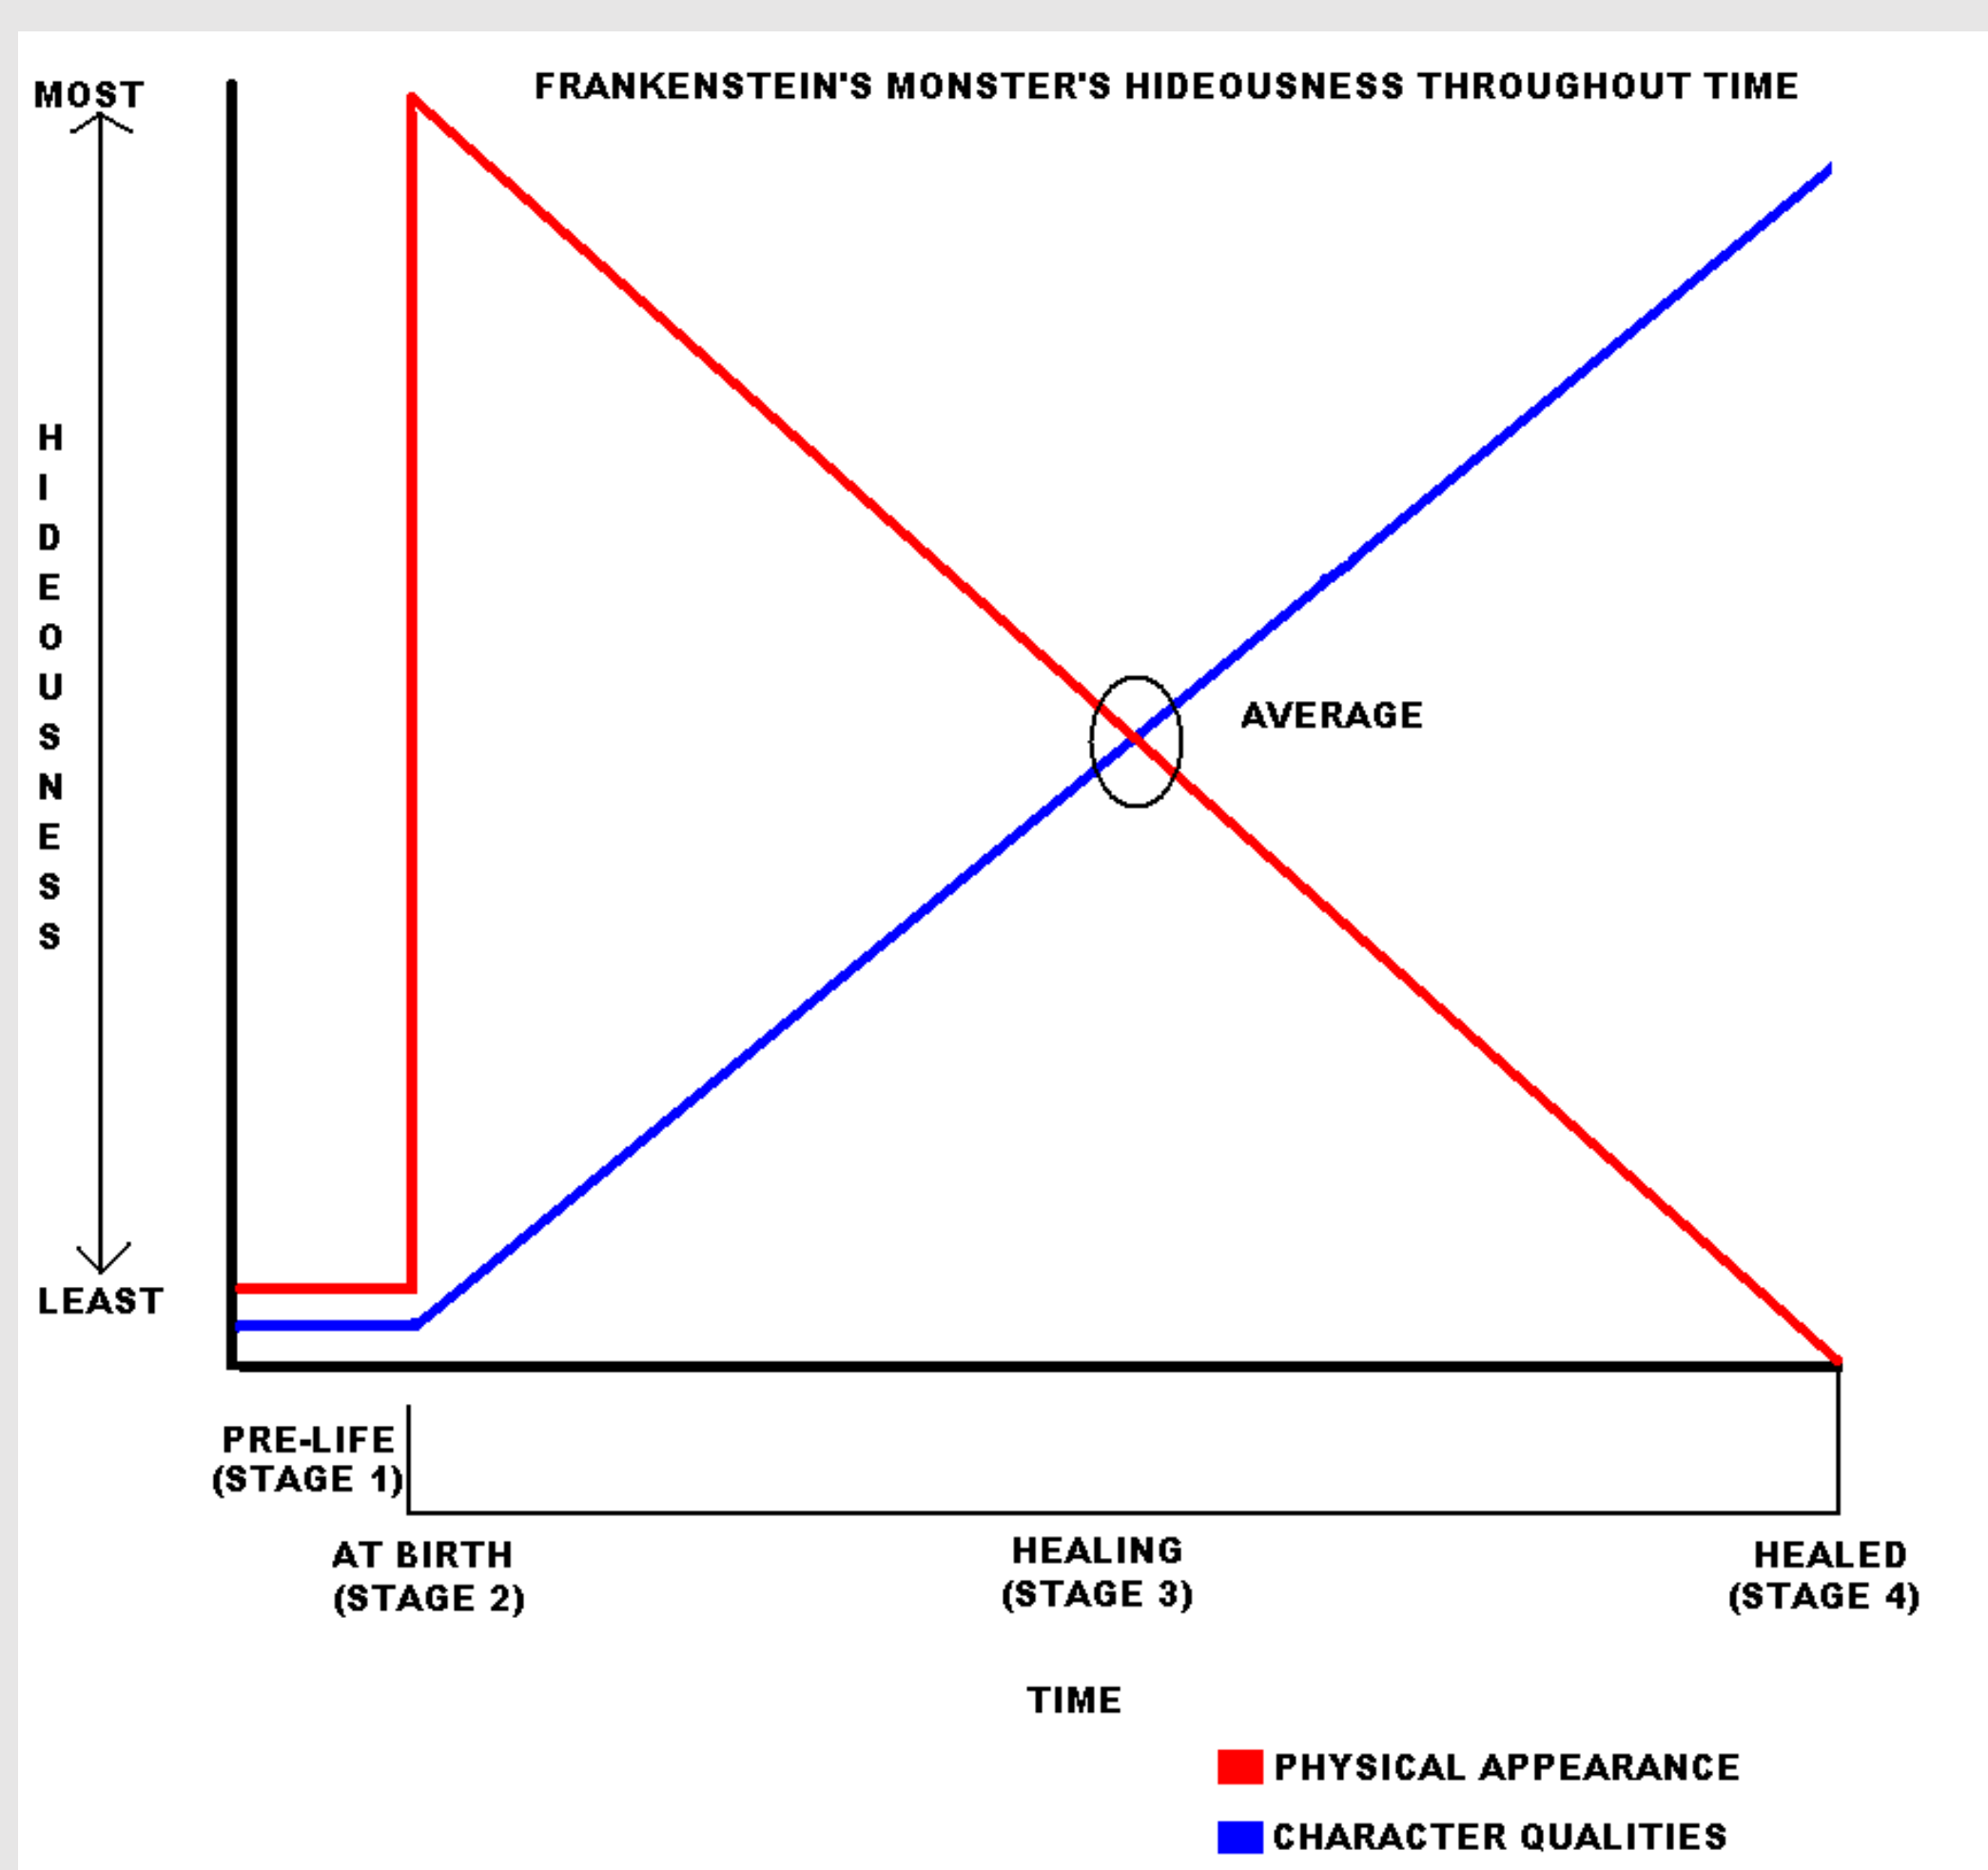

Guadalupe Rodriguez

Introduction

“I will revenge my injuries: if I cannot inspire love, I will cause fear; and chiefly towards you my arch-enemy, because my creator, do I swear inextinguishable hatred” – the creature,

Mary Shelley, *Frankenstein* 1818

- Here the creature portrays what free-will is.
- Since he does not want to love because of the way he has been treated, he has the free-will to seek revenge.

Because of the creature's actions and as the novel continues, he becomes more horrendous physically and mentally. The average is after he is healed, and before he reads Paradise Lost.

Human Free-will

Free-will is a human capability.

1. The ability to make conscious decisions.
2. Through this, one may suffer through the consequences either beneficial or not.
3. And can connect to one's moral compass.

Drawing of T.P. Cook in Presumption. Image portrays freewill. The creature is contemplating on what to do with the sword.

1818 Shelley's Artificial Intelligence

Since the monster in Mary Shelley's novel *Frankenstein* was intended to be an immortal, super human, that Victor created. did he have free-will when murdered all those people?

In sense, the monster was AI, and he was aware of his actions when killing people. When killing William, Clerval, and Elizabeth, the monster had all the control in his actions.

The monster accomplished the murders because he was eloquent and determine to take revenge on Victor.

Modern Day Artificial Intelligence

By giving AI all the capacities that a human is born with, humanity is humanizing AI. AI is given human qualities. For example, Siri and Alexa have a woman's voice. They are given gender.

In *Frankenstein*, the creature is AI and it can no longer be controlled. Victor's intentions were not to create catastrophe in his life, but the limits were pushed. As the limits with technology are being pushed today with AI, Tesla being one them.

Autopilot cars are in the works and the vehicle will need to portray free-will in a life or death situation.
