Regulators order utility to inspect gas system, blast victims return home

SAN BRUNO, Calif. — State regulators Sunday ordered Pacific Gas & Electric Co. to inspect its entire natural gas system, as victims displaced by Thursday’s San Bruno explosion began returning to their devastated neighborhoods and investigators searched for the dead.

The California Public Utilities Commission said it will ask PG&E to inspect its 5,722-mile natural gas network, giving priority to high-pressure lines such as the one that exploded in a suburban neighborhood Thursday, killing at least four people and destroying 37 homes.

Commissioners also ordered PG&E to preserve records relating to the explosion and to any work done on the San Francisco Peninsula pipeline, and singled out service performed in September 2010 at the Milpitas terminal. Commission President Michael Peevey said he received a letter from Lt. Gov. Abel Maldonado on Saturday asking him to take the actions. Maldonado has been leading the disaster response while Gov. Arnold Schwarzenegger is in Asia.

PG&E employees and contractors will be interviewed as part of the probe. The company’s process for investigating leaks will be examined as well as annual budgets to determine how much of the money authorized for leak detection is actually spent, Peevey said in a news release Sunday.

PG&E has already begun to inspect the three pipelines that serve the San Francisco Peninsula. Geisha Williams, the senior vice president for energy delivery, told residents at a packed town hall meeting Saturday, “For San Bruno and the immediate area, we are all over it, and we’re developing a comprehensive plan to look beyond San Bruno into San Francisco.”

A 7,481-foot segment of the San Bruno line, farther north, was identified as among the top 100 riskiest, according to documents filed with the California Public Utilities Commission. That segment, built in 1948, needs to be replaced because “the likelihood of a failure makes the risk of a failure at this location unacceptable high,” the documents concluded. The company proposed to spend $5 million to replace it between 2012 and 2014.

Andrew Stellaur, a PG&E spokesman, said that section was inspected on a town hall meeting in San Francisco. “No leaks were found,” he said. He said that the report’s reference to pipeline risk was “forward-looking” meaning it would become a risk if it were not replaced in the proposed timeframe.

“We constantly monitor our system and if at any time we identify a threat to public safety we act to repair it,” he said.
On this Eid, those devastated by the recent floods in Pakistan will be on the minds of many around the world.

Pakistan communities. People are donating their clothes, whatever: We still need support from Americans who are passionate about Muslims."

Eid at FIF is one of two Eid holidays celebrated by Muslims. The other one, called Eid al-Adha, takes place after the annual Islamic pilgrimage to Mecca during the 12th month of the Islamic calendar, according to the Council on American-Islamic Relations. Eid this year also comes in the midst of controversy about a mosque being built at ground zero in New York City, and talk of a Qur'an burning by Florida's Rev. Terry Jones.

All this has been reported by The Washington Post, The New York Times, CBS and Fox news and other major newspapers and television networks.

Dall said she feels that the recent controversy is caused by a constant association of Islam and terrorism in the media.

"School spirit helps the students get emotionally attached," Dall said. "(Islam) is not what you see portrayed through the media these days."

For anyone who has lived here too long, too short, or even just average, San Bruno's identity is part of our everyday experience because of height and silence, which is discrimination based on something we simply cannot avoid.

When it comes to issues of race, color, gender and religion are the most common among topics that come to mind because they are the things most obvious.

But little you start to talk about size proportions, people don't really see that there are obvious small minority advocate for intern.

A brief history of the Napoleon complex, also known as a boy's complex, was on the mind and three videos were shown during the program.

There was a question and answer segment where students discussed misconceptions and feelings they had about minorities.

Throughout the workshop, students were asked to form groups, which placed them according to their height: average, above average or below average.

According to the program, the average height of a man is 5 feet 9 inches and for women, 5 feet 4 inches. Women who are 5 feet 5 inches and under and men who are 5 feet 8 inches and under are considered below average, while women 5 feet 6 inches and over and men 5 feet 10 inches and above are average.

I thought the event was really good because I never thought of height as terms of beauty, said Miranda Leung, a senior social science major.

Leung said she thought it was very interesting because everyone was broke up into groups be mindful of your language and don't stereotype people based on their height, said Kasomo.

**DRINK OF THE WEEK**

**ANNIE COLLINS**

Monday, September 13, 2010

Every so often, my best friend and I go out together in search of a relaxing night with good food, yummy drinks and interesting conversation.

Last week, we decided it was high time for a girls’ night out and made our way to the Cheese Factory inside South San Jose’s Oakridge Mall.

While our main reason for visiting was to eat dinner, I was daydreaming about ordering one of the restaurant’s tasty drinks to finish off my busy dinner, I was daydreaming about ordering one of the restaurant’s tasty drinks to finish off my busy dinner.

As the waiter set the sweating glass in front of me, the chatter of guests and clatter of utensils on dishes was muffled by the chatter of guests and clatter of utensils on dishes.

The ambiance provided the perfect atmosphere to unwind and relax.

As the waiter set the sweating glass in front of me, the chatter of guests and clatter of utensils on dishes was muffled by the chatter of guests and clatter of utensils on dishes.

The fruit gave it a frothy, slushy consistency at the first sip, but it got better and better the more I drank.

Overall, the Georgia Peach definitely delivered an impression after paying our bill, the waiter stopped by our table one last time to ask me what I thought of the drink.

My favorite line was sung by the character Konstantin Levin, as he realizes in the end that all that matters in life is learning “to love and to be loved.”

The main characters on opening night included Anna Karenina, played by Jasmina Halimic, Alena Karenin, played by Kirk Eichhauff, Alexei Vronsky, played by Krazen Karagiozov, Konstantin Levin, played by Michael Dailey, and Kitty Scherbatsky, played by Kheri Dastoor.

Only some members of the cast were present on stage that night, as performers were interchanged for every performance.

A screen above the stage posted each line of dialogue between characters, making the...
Women’s volleyball outlasts Portland State in five sets for first of three wins

Now knotted at 1-1 in the match, sophomore setter Caitlin Andrade said the team just kept believing.

“We knew we had this game,” she said.

In the third set, the Spartans took an early lead and continued to build their dominance without relinquishing the lead or allowing a tied score.

At one point toward the middle of the set, the Spartans were nine points ahead of the Vikings.

The point difference dropped as both teams fought toward the end of the set and Portland State closed the gap to as few as three points.

However, SJSU took the third set — putting them ahead once again in the match.

The Vikings served first in game four and the Spartans trudged by the first time-set.

Portland State went on to win, sending SJSU into game five tied for the match.

“We went up and down, but we found our rhythm,” Blume said.

In the final game, the Spartans gave up two points on serves allowing the Vikings to push ahead.

Midway through, Alaska scored two points before the Vikings called a timeout while still in the lead.

The Spartans kept rolling and tied for the lead at 14-14, only two points away from clinching the win.

The Spartans blocked the attempts to score and came back from a six point deficit to take the night.

Portland State and SJSU each scored seven points overall in the match.

Crespo said the key to the Spartan victory was taking it one point at a time and not overplaying.

GAME STATS

SJSU	WIS

First downs 13	22

Third-downs conv. 3	6

Net total yards 307	403

SJSU downed by No. 11 Wisconsin

Trailing by 20, La Secla passes for second second touchdown in loss

STAFF REPORT

Though SJUU (0-2) lost 27-14, Saturday’s football game against the No. 11-ranked University of Wisconsin (2-0) showed that the team has the ability to improve, said head coach Mike MacIntyre.

“We keep telling our football team is we want to improve every week,” MacIntyre told the press after the game.

“If you watched us play last week, we improved this week and we’ve got to keep doing that.”

Last week against No. 1-ranked University of Alabama, senior quarterback Jordan La Secla completed seven of 14 passes for a total of 86 yards. On Saturday, La Secla completed 20 of 26 passes for a total of 228 yards, two of which resulted in touchdowns for the Spartans.

After losing a 15-yard pass to freshman wide receiver Noel Grigsby, La Secla connected with freshman wide receiver Chan- dler Jones for 37 yards and six points — the Spartans’ first touchdown of the season.

Jones caught eight passes for a total of 79 yards and a touchdown.

On the defensive side, the Spartans gave up 137 yard to Badger star back John Clay — but allowed 137 few yards passing than a week ago against Alabama.

Freshman defensive end Foloi Vae and freshman linebacker Derek Mosauer were each credited with a quarterback sack. The sacks were each for a class of five or more yards and each forced a fumble — bringing the SJUU season total to seven.

For the second week in a row, freshman linebacker Vince Babiga’s nine tackles tied for the team lead, shared with junior corner- back Alex Germany.

“I think they felt that as the game went along and they just kept fighting and clawing, they just got to get back to work,” MacIntyre said.

The Spartans start their home schedule against the Southern Utah Thunderbirds (1-1) at 5 p.m. on Saturday at Spartan Stadium.
Sophomore defender Krista Cullen (21) heads the ball before Riverside defender Aaren Casimiro’s arm can make contact. Cullen was part of a defensive effort that resulted in SJSU’s first shutout of the season.

The SJSU women’s soccer team achieved its first three-goal victory of the season — and first shutout — against UC Riverside (1-5) on Sunday at Spartan Stadium. Although the Spartans (2-3) came out on the field slower than head coach Jeff Leightman would have liked, he said the team gained momentum after the first goal.

“The first point was nice,” he said. “That goal changed the match and gave us new energy — we then took over the match.”

The goal was made in the first half by junior midfielder Shanelle Furner with the help of freshman midfielder Alex Jimenez and gave SJSU an early lead that was held for the rest of the game.

“We came out a little slow, with not much urgency,” Furner said. “But after the first goal we played with more intensity.”

After about four minutes after the first goal, the Spartans earned another score after junior midfielder Lauren Sanchez, without assistance, shot from 20 yards away.

“We scrambled around,” she said. “I was just there to clean it up and put it in. I was lucky to put it in.”

Sanchez said playing at home made the team less nervous and hopes that the feeling continues at away games.

“We are more comfortable here,” she said. “Hopefully we can keep it going.”

Following the second point, Sanchez said the team felt more comfortable.

“The second point gave us a cushion and we were able to be more creative,” she said.

A third point for the Spartans was shot 20 yards away and unassisted in the second half at 73:44 by junior defender Jessica Ingram.

“We were sharper than we have been,” she said. “We played better than the last game.”

Furner said the defenders helped a lot in the success of the team.

Leightman said the team did well because the players were able to work together well.

“As a team we played really well,” he said. “We were pleased with our backs. They all played well and we all communicated.”

The team’s next game is against Eastern Michigan on Thursday in Reno for the Wolf Pack Invitational.

“I have high expectations for the team,” Furner said. “It’s good to have a win before we go on the road and face a new team.”

She said the goal she shot and the win has given her more confidence in her athleticism.

“I’ll definitely try to score more,” Furner said.

Two of the three scores by the Spartans were from corner kicks and the team had 11 fouls by the end of the second half.

UC Riverside attempted four shots in the first half and five in the second half.

However, Riverside was unable to score thanks to goalkeeper Meghan Maiwald, who saved all attempts.

Furner and Sanchez expect the team to continue with this momentum.

“I have high expectations for the team,” Furner said. “It’s good to have a win before we go on the road and face a new team.”

Sophomore defender Krista Cullen (21) heads the ball before Riverside defender Aaren Casimiro’s arm can make contact. Cullen was part of a defensive effort that resulted in SJSU’s first shutout of the season.
People drive me crazy. I work in a pharmacy and the level of rudeness is a little out of control. It is simple. Stand in line, hand the clerk your medical record number, state the name of the medication or the prescription drug, if you have a co-pay and be on your way. That is it.

Sound simple enough, right? Wrong.

It is easy to understand that the majority of the patients who come into the pharmacy are sick or in pain, which is why they are cranky. But, it is no excuse to treat the pharmacist as if she were your personal slave. It’s a hospital, not everyone coming in is going to be cheerful or exchange words of cheer.

But it is really necessary to be the most polite person you can be when you come into the pharmacy?

It’s happened before, but that doesn’t mean it should happen again. It just makes them muzzle.

Standing in line, only to have people walking in with a limp, hop with crutches or use a cane, it is frustrating to get your turn.

Making to my classes takes me at least 10 minutes longer than it would be if I were not in a wheelchair. I have been out of work since playing soccer, but despite the fact that I can barely walk, people don’t give up their spot in line for the elevator.

It’s happen before, but that doesn’t mean it should happen again. It just makes them muzzle.

The ease of cutting calories

People with perfectly good legs and probably good health at no expense. In a respectable way, then the flow into the pharmacy would be much smoother.

It’s not that hard to miss me.

You may have seen me hobbling around campus.

The handicapped stall is always crowded with someone who just feels that they deserve more space than the rest of the population.

Staff must wait for their own stalls, because of people with no respect for their conditions.

The last time I used a handicapped stall was last semester. My classmate was in the bathroom of what I thought was an empty church.

A woman was in a wheelchair and in started yelling, ‘I don’t know who’s going to walk! What on earth are you doing in my stall?’

I have seen other stalls that seem empty, but with crutches or in need of the bars for assistance.

The buttons that open doors automatically are sometimes not working because too many people have pressed them indiscriminately.

I am also guilty of this, but have been warned that to all of us. ”

People who follow the procedure are nice to us.

Let me tell you a little story.

I sustained while playing soccer. It wasn’t until I met up with a friend’s family where I had no choice but to stand and take that comment because I knew she wasn’t wrong.

The next day I went over to a friend’s house where his father saw me and said that he looked like you’ve packed on some weight.

It may have been easier than the mother from the previous scenario, but the same was true. I was fat and should do something about it.

I didn’t really know what to do.

Calorie counting was something I had never done, nor something I had ever thought about.

I did feel guilty about it.

It wasn’t until I met up with a friend and his family where I had no choice but to stand and face my embarrassment until the next time.

I did feel guilty about it.

I went to buy 15 pounds, which the app suggested I limit myself to 1,800 calories a day, which I was completely fine with. Calorie counting was something I had never done, nor something I had ever thought about.

Randomly I happened to be looking at the app on my phone.

When it comes down to respect.

I want to save $15, pounds, which the app suggested I limit myself to 1,800 calories a day, which I was completely fine with. Calorie counting was something I had never done, nor something I had ever thought about.

I became more aware of my food choices, switched from

I got earlier had completely changed my life.

I was eating 4,000 calories a day.

For now, I’m no longer walking with a cane.

I was eating 4,000 calories a day.

It wasn’t until I met up with a friend and his family where I had no choice but to stand and take that comment because I knew she wasn’t wrong.

Calorie counting was something I had never done, nor something I had ever thought about.

I didn’t really know what to do.

Calorie counting was something I had never done, nor something I had ever thought about.

I didn’t really know what to do.

Calorie counting was something I had never done, nor something I had ever thought about.

I didn’t really know what to do.

Calorie counting was something I had never done, nor something I had ever thought about.

I didn’t really know what to do.

Calorie counting was something I had never done, nor something I had ever thought about.

I didn’t really know what to do.
