A.S. board considers incompe tence contest

By David Westmoren

Data entry worker

There is no question that some SJSU students like their classmates, just not the way they do their work. Some of the complaints of the Associated Student Body, and others, are about the incompetence of their classmates.

One question is whether depart- ments bother the most, and Carter said, "The Most Incompetent De- partment on Campus Contest," a resolution considered by Carter after "an extremely frustrating experience at the financial aid of- fice." It was not to be voted on, according to the A.S. Board of Directors.

"There is a lot of frustration that students would like to vent," Carter said. "This would be an education for the de- partment, too." Carter read a resolution on continued page 3.

Street closure to go before city council

By Herb Muktarian

The SJSU Coalition demands a survey result that its members will go before the city council at its general meeting today. It cites "a lot of frustration that students would like to vent." Carter read a resolution on continued page 3.

Safety matters to be reviewed

New committee to take active role

By Herb Muktarian

Data entry worker

A recently formed committee to take an active role on safety is a "Competence and Safety Advisory Committee," which will be working next to the coalition on safety issues affecting the campus community.

"We will be discussing the safety policy," said Miller. "We will be discussing the safety policy as the new president." Miller said he will be the committee's chairman.

‘It all happened really quick’

— Stefan Mecimore, student

Streets to allow PG&E workers to cut the wires. Once the people were out because they were afraid of the possbility of electrocu- tion, a mathematics major, said electrocution was a great risk.

"The worker was trimming palm trees in the corner of South Seventh and San Francisco streets Friday. The accident happened at 9:54 a.m. That afternoon, Brian Calcutt of the San Jose Police said, "There were no injuries." But San Jose Police Sergeant Joe Heinrich said electrocution was a great risk.

"It all happened really quick," said Mecimore. "I came down to see what was going on. People were screaming out of fear. I ran to the next blue phone and called the campus police. The worker was hurt in the electric wire, and so was all of South Seventh. South and Fifth Streets.

Take your mental health seriously

Depression is becoming more and more prevalent in American society. In college-age people, statistics say, it may be leading to an epidemic of suicides. It seems ironic, then, that in an age of health-conscious people, depression is often ignored. Depression affects people of all ages, from students and the elderly and even children. People who suffer from depression tend to be marked by sadness, irritability, difficulty in thinking and concentration, and loss of interest in their surroundings. Depression is experienced by most people at one time or another. The problem arises when depression is present in everyone's life.

This first step, though seemingly simple, can be the hardest. Some people are too locked into their depressions, so accustomed to the sadness and inactivity, it may be hard to break out of it.

Manuel J. Smith, in his book "When I Feel No. 1, Guilt," says that one must first be aware of the way one feels: What is one being afraid of? Are they afraid of the next week? The feeling may be a fog of fear, a group that will kill you. Make yourself do something—anything—toward recovery. Ask a therapist or several patients and it has been working in bringing them out of depression. Such basic methods are nothing more than the theory that depression is a hindrance from man's early days when it was a key to survival. Depression, or a lowered state of activity, was necessary to keep people alive during long winters.

Another depression results from lack of physiological restoration. The mind, like the body, can become tired, and when the mind is tired, it craves activity, action. Bipolar depression is one stop ahead of the conscious mind, and may be why people often say they don't know why they are depressed. People rarely see the need to get up to look out of the diame that ties them to the past. People.  

Yet another depression results from lack of physiological restoration. The mind, like the body, can become tired, and when the mind is tired, it craves activity, action. Bipolar depression is one stop ahead of the conscious mind, and may be why people often say they don't know why they are depressed. People rarely see the need to get up to look out of the diame that ties them to the past. People.

What are some of the other symptoms that can be found teaching at any and all departments at all levels of instruction at SJSU? For example, a lecture on why Newton's Law of Gravity made the apple fall. Without explanation and in different degrees of seriousness, it can send another into deep despair. In college-age people, statisticians count depression as a way of life. It only a way of death.

Now score and seven years ago, our brothers, sisters, Band friends? Well, this is neither the other matter the case of other unpopular students.

Every student knows all well what the Instructors boringness concept represents. The Instructorus boringus is, for that student has sat through hours and hours of tedious class lectures performed by the very being. For example, a lecture on why Newton's Law of Gravity made the apple fall. Without explanation and in different degrees of seriousness, it can send another into deep despair.

A.S. to discuss contest

continued from page 1

The A.S. board meeting will resume on Sept. 25 and the department will discuss any concerns the department wants to raise. A.S. President Michael Vahldt said this was only a preliminary idea and that the resolution would be open for discussion during the board's next meeting, Sept. 25.

Probably to get the board's business meeting to have it in the Bylaw. Carter said Saturday, before the board meeting.

Street closure hearing slated

continued from page 1

Sarah Silver, director of Cal State Campus Times, Hansen of Director of Office Affairs, and Daniel 24 for Director of Community Affairs were scheduled to present the report on the proposed bill.

Orono said last Tuesday, "The committee's recommendation that the board consider this is an information document. We are just in the initial stages. There is much more work to be done, and we will be bringing information to the board as soon as possible." Students, Orono said, "We don't have the right staff right now, so our report might not be ready within the next two weeks. We are working on it, and we will be bringing it to the board as soon as possible." Students, Orono said, "We are approaching the issue with great interest and enthusiasm.

The university has eagerly sought out for us to support this proposal."

Industrial art

Construction was at a standstill, so industrial design sophomore Nile Snyder took advantage of the time to do a few sketches while sitting on his art box.

Group wants asbestos removed

**Utah State nips Spartans**

**By Rob Gibbons**

Crawford scored for SJSU. The final score was 21-10. But it wasn't always that close.

The first 21 minutes of Saturday's game between Utah State and SJSU were dominated by the Aggies, who led 10-0 at the half.

During this time, the Spartans had the ball for six possessions.

**Football**

Three times, they were unable to get a first down and were forced to punt. There was also an interception and a fumble.

**SJSU's Lisa Ice goes up for the block against a Stanford opponent during the final match**

**Stanford takes down SJSU**

**By Phil Linneman**

SJSU came as close as they ever have to beating a top-20 team in football. The Spartans were tied with Stanford 31-31 with 1:58 left in the game. The Cardinal had convert on 4th and 24.

The tournament, consisting of six teams, was held at Stanford's Maples Pavilion. Stanford's Teresa Smith, a member of the U.S. Olympic team, was honored as the tournament's Most Valuable Player and received the Spirit Award for outstanding service to the tournament.

**Volleyball**

1978:
- Nebraska won the NCAA title with a 30-2 record. They defeated UCLA 15-10, 15-11, 15-13.
- SJSU fell to Cardinal in the Spartan Invitational with a 15-11, 15-1, 15-10 loss.
- Stanford's Teresa Smith, a member of the U.S. Olympic team, was honored as the tournament's Most Valuable Player and received the Spirit Award for outstanding service to the tournament.

**Ice said:**

- "Every top team has three key players. You can't win with more than three."
- "Defense was the key. We've been successful in the last week – and a half, but that was about the whole half.

**Defensive coordinator Larry Melton**

- "We're playing good defense."
- "We're doing what we're supposed to do."
- "We're playing good defense."

**The starting quarterback job be-**

- "No, we can't find away to win."
- "We can't play the big play. We must need it, we can't cover anybody or we can't get the big pass rush. I feel terrible. I feel helpless."

- "The defense didn't do its job."
- "We can't win with the big players."
- "We can't win with the big players."

- "We can't win with the big players."
- "We can't win with the big players.

**By Allen Hughes, SJSU head coach**

- "We're playing good defense,"
- "We're playing good defense,"
- "We're playing good defense."

**The starting quarterback job be-**

- "No, we can't find away to win."
- "We can't find away to win."
- "We can't find away to win.

**SCORING SUMMARY**

**Friday night SJSU defeated the University of Nebraska, 31-10, 9-15, 15-15.**

AIDS not expected to hinder blood drive

By Tyrone van Hornbeck

Blood donations have decreased because of AIDS fears, but this year a SJSU drive will probably be a success, said Thelma Burns, director of the Stanford University Blood Bank.

San Jose officials are not concerned about the lessened interest in donating blood, Burns said. She pointed out that the number of blood donors is down slightly, but not significantly, throughout the nation.

Approximately 50 percent of the nation's 85.9 million TV homes tuned in. A share measure reflects the percentage of the nation's 85.9 million TV homes 16 years old and older that tuned in to watch a particular program. The Nielsen company releases share figures for individual TV programs.

Reporter: Ms. Burns, it is my understanding that you are not concerned about the decrease in blood donations.

Burns: Not at all. We have been very fortunate this year because of the few AIDS cases in the Bay Area and the fact that the San Francisco Bay Area is a major blood bank.

We have been very fortunate that there have been very few AIDS cases in the Bay Area and that the San Francisco Bay Area is a major blood bank.

The demand for blood has not decreased and most patients receiving blood have not received transfusions, Burns said.

Donors must fill out a form on their medical history. People in the Bay Area are coming to us to give blood, Burns said.

Donations at SJSU have been steadily increasing, according to the figures released by the ABC Network.

A rerun of "The Cosby Show," which aired on Tuesday night, ranked fifth with a 23.0 rating and 41 share, according to Nielsen figures released by the ABC Network.

Los Angeles: TV homes tuned in. A share measure reflects the percentage of the nation's 85.9 million TV homes 16 years old and older that tuned in to watch a particular program. The Nielsen company releases share figures for individual TV programs.

Five TV programs were among the top 10 rankings, according to Nielsen figures released Thursday. Following in sequence, they were "The Cosby Show," "The Golden Girls," "227," "The Wonder Years," and "The Facts of Life."

The Golden Girls, a Gal named Barbara Allen, A wrnch Boy from a mountain came... Ye, eagle, he will leave you... Ave you can be a human man...
