**JUST AMONG OURSELVES**

By BR. T. Auel/GRAYE

Twenty years from now some of you will be leaders in America. Mr. Perhaps you don’t see that as clearly as I do, but the men who were leading the last time I was here were the leaders. Some of them have had great success in business, some have become authors, some have become political figures, and some have become just plain old friends. I have read a letter of the old war who has made a success of his life, who has made a contribution to the happiness of mankind.

I don’t think I can go into great detail of how you are going to live, but you are going to make failures, and that is all right. That is the way it is. But the men who were leading the last time I was here were the leaders. Some of them have had great success in business, some have become authors, some have become political figures, and some have just been plain old friends. I have read a letter of the old war who has made a success of his life, who has made a contribution to the happiness of mankind.
