Dear Margarita Taula,

This paper is a government work not subject to copyright protection in the United States. Permission to reprint any material from it is not necessary. AIAA requests that you do cite the original manuscript properly, however.

Let me know if you have any additional questions.

Sincerely,

Michael Baden-Campbell

AIAA Publications

Subject: Permission letter for use of copyrighted material

Hello,

I am a graduate student in the Human Factors and Ergonomic's program at San Jose State University. I am completing my Master's Thesis entitled "Effect of Level of Automation and Failure Frequency on Operator Performance." I am writing to request permission to reprint in my dissertation an image (see attached letter) from the following:

Mueller, E., Bilimoria, K.D., and Frost, C. (2009). "Effects of Control Power and Inceptor Sensitivity on Lunar Lander

Handling Qualities," AIAA Journal of Spacecraft and Rockets, 48(3), 454-466. doi: 10.2514/1.49276

After submitting my thesis to Graduate Studies and Research (GS&R), the publisher and GS&R requested an official permission letter for use of copyrighted material in my thesis, since it will be published for San Jose State University access only. I have attached the official letter. If it is acceptable, please sign and return to me. Please feel free contact me should you have any questions.

Thank you,

Margarita Taula
