Hi Maggie,

Feel free to use the image – I modified it from an un-copyrighted (and un-citable) diagram in an excel worksheet from some colleagues at JSC. The diagram was used for the work in the following paper, though the diagram itself does not exist in that paper, so if you'd like to cite some source I'd use the following:

Mueller, E., Bilimoria, K. D., and Frost, C., "Effects of Control Power and Inceptor Sensitivity on Lunar Lander Handling Qualities," AIAA Journal of Spacecraft and Rockets, Vol. 48, No. 3, pp. 454-466. DOI 10.2514/1.49276

Thanks,  
Eric

Hello Eric,

I'm a research assistant (to Jessica Marquez) here at Ames, working on my Master's thesis. I am writing to ask for permission to use the reaction control system image in your "Propulsion System Architecture" paper on page 1 (see attachment). Please let me know if it is okay for me to include it as a figure in my thesis and how you would like to be cited. If you obtained it from somewhere else, please let me know so I can go through the proper channels for inclusion in my thesis.

Thank you,  
Maggie
